# Disposable RF Electrode

## Better For Your Patients

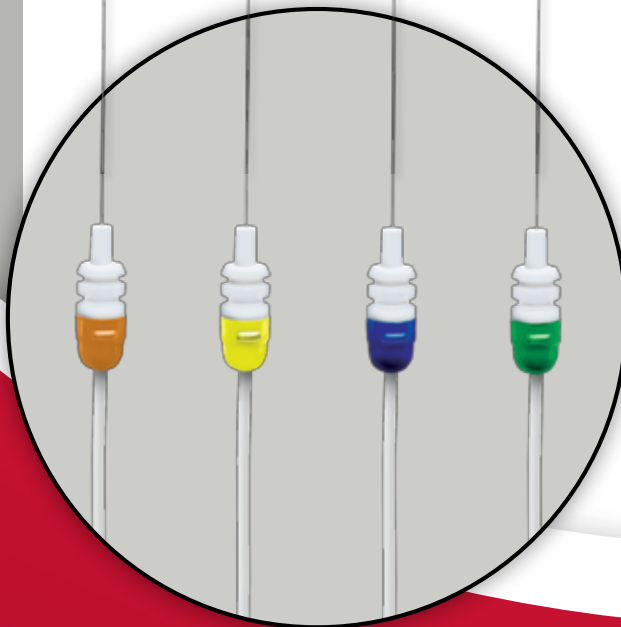

Eliminates the possibility of infectious disease transmission to patient or staff

## Better For Your Staff

Eliminates reliability problems with a simple and easy-to-use system

## Better For Your Hospital

Eliminates the cost of resterilisation, the possibility of loss or damage to electrodes and the need for records traceability

The only NeuroTherm  
approved electrode for all  
NeuroTherm generators

## The Disposable RF Electrode

Our disposable colour-coded RF electrodes are designed for use with radiofrequency generators in (P)RF procedures. The electrode is equipped with a 3m cable that connects to the RF generator through a much shorter 20cm adapter cable. This ensures that both the adapter cable and generator are well outside of the sterile field.

Description	Colour	Part #
5 cm Disposable Electrode	Green	RFDE-5
10 cm Disposable Electrode	Blue	RFDE-10
15 cm Disposable Electrode	Yellow	RFDE-15
20 cm Disposable Electrode	Orange	RFDE-20
Adapter Cable for the NeuroTherm RF Generator DAC-NT		

**“We have found that the NeuroTherm Disposable RF Electrodes give us more flexibility in the scheduling of procedures. Having a supply on hand, we no longer have to restrict our days of usage around sterilizing requirements and we always have them available in case of contamination during a procedure.”**

Kit Manning RN, BSN, Director of Nursing, Centers for Pain Solutions
